

Elevate relationship management with a single view of all interactions across projects

Consultation Manager helps maintain positive relations with a large ecosystem of interconnected communities and organizations, building trust and keeping projects on track.

The gold standard for relationship management, Consultation Manager is a centralized platform that provides a single source of truth for governments, transportation agencies, consulting firms, utilities, and other organizations. It delivers clarity on the dynamic experiences, connections, ideas, and events that shape relationships, supporting better decisions.

Capture interactions across projects, map connections and sentiments, engage strategically, and resolve matters quickly to foster strong community relations. Consultation Manager is easy to use and highly customizable, simplifying engagement, streamlining regulatory reporting, and elevating your reputation.

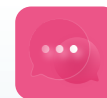

Let's take a look at an overview of our community issues and communications in March.

Access a shared single source of truth from anywhere

Manage relationships across multiple projects

Facilitate internal collaboration among teams

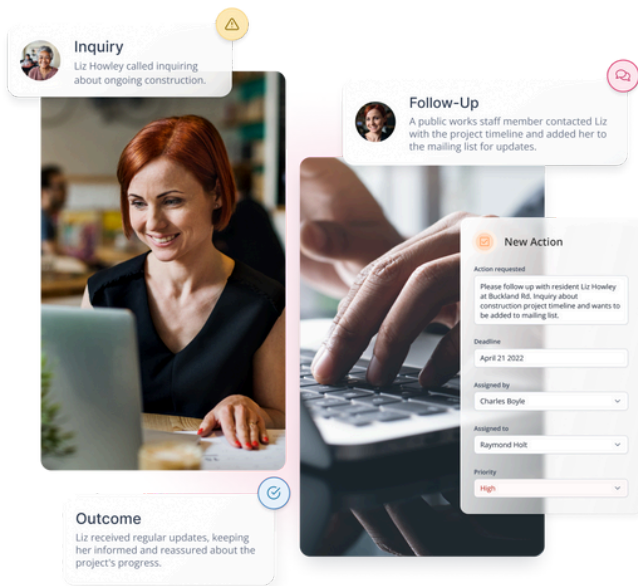

Equip your staff with essential tools for success

Proactively manage risk and ensure compliance

Improve decision-making with insightful reporting

Capture community interactions

A secure cloud-based platform, Consultation Manager makes it easy and convenient to capture and access information and interactions from anywhere. No more sifting through siloed spreadsheets and emails. Track and access the history of stakeholders at any time and go into your next conversation armed with context.

- Flexible data imports and automated email saving
- Customizable profiles and data capture
- Issues and opinions capture via online forms
- Document storage for record-keeping
- Integrations with Social Pinpoint and an open API

Analyze your impact

Live dashboards and scheduled reports help you identify issues and trends that could become risks or opportunities, allowing you to spot sentiment patterns before situations unfold. Out-of-the-box and custom reports enable you to track engagement and streamline compliance management.

- Identification and prioritization of interested groups
- Custom and templated reports to track engagement
- Identification of trending issues and sentiment
- Powerful multi-layered search and data filtering
- Scheduled reports and sharing across teams

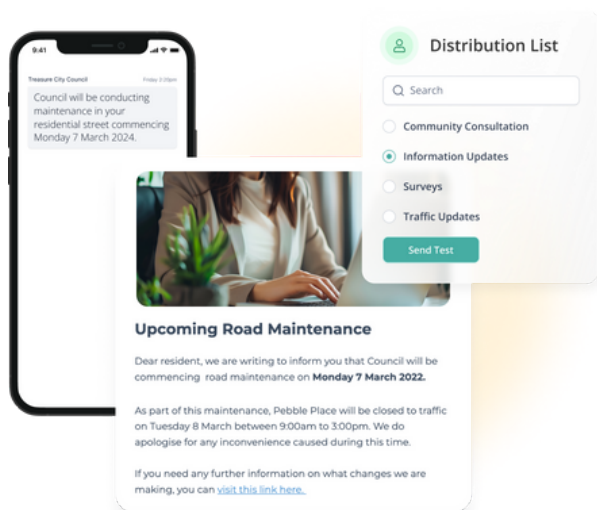

Streamline workflows

Build trusting, transparent, and collaborative relationships by tracking sentiment, responding to requests, and distributing timely communications.

- SMS and email capabilities for sending project updates
- Task management for timely responses
- Storage, search, and data management across projects
- Restricted access to sensitive data

Consultation Manager saves valuable setup time with out-of-the-box best practice settings and adaptable configuration for a fully customized solution.

Trusted by hundreds of leading organizations worldwide!
